I am writing to express my strong interest in the Auszubildender zum Steuerfachangestellten (m/w/d) role at Kohnle & Partner. With more than 1 year of drone, AI, and autonomous systems experience, I bring a combination of production-grade development skill and research-driven engineering judgment.

Through research and development work, the strongest overlap I see is around drone, UAV, and robotics systems. Those areas match the way I approach engineering work: understand the role's actual requirements, choose the relevant tools, and build systems that remain clear, reliable, and maintainable.

A relevant example is Decentralized Coordination in Secure Autonomous Drone Swarms, which connects to the role through reliability, maintainability, and real-world implementation. This gives me a concrete basis for contributing to similar responsibilities without overstating skills that are not part of my profile or not requested in the role. For a mid-level role, I would focus on implementation quality, ownership of assigned work, and reliable delivery against product and engineering requirements.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

Sincerely,

Md Shahanur Islam Shagor
