I am writing to express my strong interest in the Social Media Manager TikTok and Founder role at Once Upon a Farm. With 4 years of professional full-stack web development experience, I bring a combination of production-grade development skill and research-driven engineering judgment.

One area that particularly interests me is the company's focus on modern financial technology and scalable digital products.

I am comfortable collaborating across distributed teams and communicating clearly in asynchronous environments.

In my professional experience, I can connect this role most directly to full-stack web development. My focus is on practical implementation, clean architecture, and careful execution around the exact technologies and responsibilities present in the job description.

A relevant example is Multivendor E-commerce Management Platform, which connects to the role through performance, scalability, deployment, and maintainable delivery. It reflects how I move from requirements to working systems while keeping performance, reliability, and maintainability visible throughout the work. For a director-level context, I can speak to systems thinking, automation opportunities, process improvement, and business impact, while avoiding unsupported claims about people-management experience.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

Sincerely,

Md Shahanur Islam Shagor
