I am writing to apply for the Talent Acquisition Partner position at Peak Credit Union. The role's focus on creating a positive experience for candidates and partnering closely with hiring teams aligns with my background in cross-functional collaboration and process management.

In my professional experience as a Web Developer, I have worked closely with stakeholders, engineering teams, and business partners to deliver projects on time and within scope. This required clear communication, active listening, and the ability to translate technical details into understandable language for non-technical audiences. These are the same skills needed to build strong relationships with candidates and hiring managers throughout the recruitment lifecycle.

One area where I have consistently delivered is managing end-to-end workflows. From gathering requirements to coordinating with multiple teams and ensuring smooth handoffs, I understand the importance of structure, follow-through, and attention to detail. I approach every interaction with the goal of creating a clear and respectful experience, whether the person is a team member or a candidate.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background can contribute to Peak Credit Union's talent acquisition efforts. Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
