I am writing to apply for the Marketing Assistant role at Sleek Marketing. Your description of a hands-on, execution-focused position where systems and reliability matter most aligns well with how I work.

Although my professional background is in software engineering, I have developed strong organizational habits and a systematic approach to getting things done. In my previous roles, I managed multiple tasks, communicated clearly with stakeholders, and ensured nothing fell through the cracks. I am comfortable following established workflows and executing tasks without needing to reinvent the strategy.

I am confident I can quickly learn Kajabi and Go HighLevel with the training provided. I am used to picking up new tools and platforms as part of my development work, and I enjoy working within clear systems and checklists. I am reliable, deadline-driven, and focused on delivering consistent results.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how I can support Sleek Marketing’s operations and email marketing efforts.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
