I am writing to apply for the Junior Front End Developer position at Work Force Nexus. I have been building responsive, user-focused web interfaces for over four years, and this role aligns well with my frontend development experience.

My frontend work centers on React, Next.js, TypeScript, and Tailwind CSS. I focus on creating clean, accessible, and performant UIs that work well across devices. I also integrate REST APIs and manage state efficiently to deliver smooth user experiences.

In my professional experience as a Web Developer at Explo-IT, I built responsive, SEO-friendly interfaces using Next.js and Tailwind CSS. I collaborated closely with backend engineers to integrate APIs and implemented real-time features such as live notifications and chat. I also deployed and maintained applications on Linux servers with Docker and Nginx.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my frontend skills can contribute to your team.

Sincerely,

Md Shahanur Islam Shagor
