I am writing to apply for the Regional Sales Manager position at Johnson & Johnson MedTech in Lucknow. Your company's commitment to healthcare innovation and improving patient outcomes through MedTech solutions is something I find genuinely compelling.

While my professional background is in software engineering rather than medical device sales, I bring transferable strengths that align with this role. Through my experience delivering complex web applications, I have developed strong project management skills, the ability to analyze competitive landscapes, and a disciplined approach to problem-solving. I am comfortable working with data to identify opportunities and adjust strategies to meet objectives.

One area that particularly interests me is the customer-centric focus of this position. In my previous work, I collaborated directly with clients and stakeholders to understand their needs, translate requirements into actionable plans, and ensure satisfaction with the final outcome. I am confident these communication and relationship-building skills will serve me well in developing long-term partnerships with healthcare professionals and retailers.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills and approach can contribute to the Ethicon Endo Surgery team in Lucknow.

Sincerely,

Md Shahanur Islam Shagor
