I am writing to apply for the Creative Project Manager position at YunoJuno. The role's focus on leading high-visibility creative projects and improving operational workflows through AI and automation aligns with my experience in managing complex, cross-functional initiatives.

In my professional experience as a Web Developer, I have managed multiple concurrent projects from intake to delivery, coordinating with designers, writers, and business stakeholders to ensure clarity of briefs and alignment with brand standards. I have developed detailed production plans, facilitated project kickoffs and design reviews, and maintained meticulous documentation to foster transparency across teams.

One area that particularly interests me is the opportunity to integrate AI and automation into project operations. Through my work on AI-powered applications, I have experience identifying process inefficiencies and implementing automated solutions to improve administrative efficiency and scale. This includes building systems that streamline workflows and reduce manual effort.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my project management and automation experience can contribute to YunoJuno's creative operations.

COMPLEMENT

Sincerely,

Md Shahanur Islam Shagor
