I am writing to apply for the Leiter IT Operations & Security position at the client of beratungsgruppe wirth + partner, a globally recognized manufacturer of transmission technology serving industries such as mechanical engineering, renewable energy, medical technology, and defense. The opportunity to lead IT infrastructure and security operations for an international technology company with production sites across Germany, the USA, China, and Slovakia is exactly the kind of challenge I am looking for.

My professional experience includes managing Linux-based server environments, configuring Nginx and Apache, and deploying containerized applications using Docker. I have worked extensively with cloud platforms including AWS and Google Cloud, and have set up monitoring and observability stacks using Prometheus and Grafana to ensure system performance, availability, and security. I also have hands-on experience with CI/CD pipelines and database administration with MySQL and PostgreSQL.

One area that particularly interests me is the responsibility for IT architecture development, both on-premises and private cloud. In previous work, I have designed and maintained hybrid infrastructure setups, implemented role-based access control and authentication mechanisms, and ensured compliance with security standards. I have also led technical projects from planning through deployment, coordinating with external service providers and internal teams to deliver reliable, secure systems.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I would welcome the opportunity to discuss how my background in IT operations, infrastructure, and security can contribute to your client’s continued success. I have attached my CV for your review and look forward to hearing from you.

Sincerely,

Md Shahanur Islam Shagor
