I am writing to apply for the Referent (m/w/d) Konzernrechnungswesen / Controlling position at Lˆ¶dige Industries GmbH. Your company's global leadership in logistics systems and airport solutions is impressive, and I am interested in contributing to your finance and controlling team.

My background is in software engineering, where I have developed strong analytical and data-driven problem-solving skills. Through my work on financial applications and data-intensive projects, I have gained experience in processing complex datasets, generating reports, and identifying optimization opportunities. I approach data with precision and a focus on actionable outcomes.

One area that particularly interests me is the analysis of period results and the creation of KPI reports. In my project work, I have built systems that track real-time metrics, monitor system health, and generate performance reports. These experiences have taught me how to structure data, identify trends, and present findings clearly.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my analytical skills and structured approach could support your team in Paderborn.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
