I am writing to apply for the Senior Performance Marketing Manager, Paid Social role at Neuraum Ventures GmbH. Your mission to support the entire home-building journey through AI-driven discovery and conversion is a compelling challenge, and I am interested in contributing to the demand-creation engine you are building.

My background is in software engineering and AI, with a focus on building practical, scalable systems. I have worked on projects that integrate AI into production workflows, including training custom AI assistants using GPT models and integrating image processing APIs for automated content generation. I understand how to build the technical infrastructure that powers creative workflows at scale.

One area that particularly interests me is the opportunity to build AI-powered workflows for creative production and campaign optimization. In my project work, I have developed systems that use AI to generate variants, process data, and automate repetitive tasks. I am comfortable working with APIs, databases, and deployment pipelines to turn ideas into working tools.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my experience building AI-powered systems could support Neuraum’s demand-creation goals.

Sincerely,

Md Shahanur Islam Shagor
