I am writing to apply for the Leitender Projektleiter Photovoltaik Gewerbe und Groˆanlagen position at Apricus Solar AG. Your focus on building professional project structures and taking full operational ownership of large-scale photovoltaic installations aligns with how I approach technical project delivery.

My professional experience is in software engineering and autonomous systems, where I have led complex technical projects from initial planning through deployment. I am accustomed to taking end-to-end responsibility for project outcomes, coordinating internal teams and external partners, and maintaining clear schedules, budgets, and quality standards. The requirement to lead two additional project managers while running my own projects is a structure I find motivating, as I have experience mentoring team members and ensuring consistent workflows across parallel workstreams.

One area that particularly interests me is the emphasis on operational strength and hands-on project leadership rather than purely administrative management. In my previous roles, I have built and maintained project plans, tracked risks, managed escalations, and ensured that deliverables met both technical and business requirements. I am comfortable working directly with clients, suppliers, and technical teams to resolve issues and keep projects moving forward.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my project leadership experience and structured approach can contribute to Apricus Solar AG’s continued growth in the photovoltaic sector.

Sincerely,

Md Shahanur Islam Shagor
