I am writing to apply for the Head of Digital position at ju:niz Energy GmbH. Your work in building large-scale battery storage projects and creating the digital foundation for a sustainable energy system is exactly the kind of challenge I want to contribute to. The opportunity to shape a scalable digital platform strategy in a growing energy company aligns well with my technical background and hands-on approach.

Through my professional experience as a full-stack developer, I have built and scaled digital platforms that combine robust backend architecture with modern frontend interfaces. I have worked extensively with Laravel, Next.js, React, Node.js, and cloud services including AWS and Google Cloud. My work involves designing RESTful APIs, implementing authentication and role-based access control, optimizing database performance, and deploying applications on Linux servers using Docker and CI/CD pipelines. I also have practical experience with real-time features using WebSockets and integrating third-party services like payment gateways and cloud storage.

One area that particularly interests me is the integration of AI and automation into platform strategy. I have developed AI-powered applications using OpenAI APIs and Replicate for image processing, built intelligent assistants, and implemented automation workflows. I also have experience with monitoring and observability tools like Prometheus and Grafana, which I believe are essential for maintaining a healthy digital infrastructure. My background in cybersecurity research, including work on secure communication protocols and blockchain-based frameworks, gives me a solid foundation for addressing governance and regulatory requirements such as ISO 27001.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my experience can support ju:niz Energy’s digital transformation.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
