I am writing to apply for the (Senior) Produktentwickler - Home & Personal Care position at everdrop GmbH. Your mission to make sustainable household products the new standard is something I find genuinely meaningful, and I would welcome the opportunity to contribute to your product development team.

My background is in software engineering and AI systems, where I have developed strong project management, analytical thinking, and documentation skills. I am used to taking ownership of complex projects, coordinating with multiple stakeholders, and delivering results with precision and reliability.

One area that particularly interests me is the combination of innovation management and regulatory oversight described in the role. In my previous work, I have managed end-to-end product delivery, coordinated with cross-functional teams including procurement and external partners, and maintained rigorous documentation standards. I am confident in my ability to apply these skills to the product development lifecycle at everdrop.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my experience could support everdrop’s product development goals.

Sincerely,

Md Shahanur Islam Shagor
