I am writing to apply for the Business Development Manager position at aurivus GmbH. Your work on transforming unstructured 3D point clouds into intelligent digital twins for industrial applications is a genuinely innovative approach to industrial reality intelligence, and I find the intersection of AI, enterprise sales, and operational execution compelling.

My background combines software engineering with a strong interest in AI and industrial technology. Through my professional experience, I have developed the ability to understand customer needs, structure opportunities, and follow projects through from initial contact to successful delivery. I am comfortable working with enterprise-level stakeholders and translating technical capabilities into clear business value.

One area that particularly interests me is your emphasis on being a growth operator rather than a traditional sales hunter. In my previous roles, I have consistently taken ownership of end-to-end processes, from identifying opportunities and preparing pitch materials to supporting implementation and follow-up. I approach business development as a structured process and focus on converting pipeline into concrete outcomes.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am eager to bring my operational strength, customer focus, and interest in AI-driven industrial solutions to aurivus. I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to your growth.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
