I am writing to apply for the Systemadministrator IT-Infrastruktur position at Assecor GmbH. Your focus on maintaining a stable and secure IT landscape while actively developing and optimizing infrastructure aligns with my experience in Linux system administration, server management, and infrastructure automation.

Through my professional experience, I have worked extensively with Linux servers, managing both Nginx and Apache web servers, configuring Docker containers for application deployment, and setting up CI/CD pipelines to streamline releases. I have also used monitoring tools such as Prometheus and Grafana to track system health and performance. These skills directly support the responsibilities of operating, developing, and securing IT infrastructure environments.

One area that particularly interests me is the emphasis on IT security and continuous improvement. In my previous roles, I have been responsible for ensuring system stability and security, implementing role-based access controls, and identifying optimization opportunities. I am comfortable taking ownership of infrastructure projects and working pragmatically to improve existing systems.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to the Assecor team.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
