I am writing to apply for the Senior Implementation Project Manager / Implementation Project Lead position at PADOA GmbH. Your mission to modernize workplace health prevention through a scalable SaaS platform is both meaningful and technically ambitious, and I am interested in contributing to the growth of your German deployment organization.

My professional background is in full-stack software engineering, where I have led the end-to-end delivery of multiple complex web applications. This has given me direct experience in managing the full project lifecycle, from initial discovery workshops and requirements gathering through to development, testing, go-live, and post-launch stabilization. I am accustomed to creating detailed project plans, tracking milestones and dependencies, and managing resources to keep delivery on schedule.

A significant part of my work has involved stakeholder and escalation management. I have regularly coordinated with business leaders, technical teams, and external clients to align expectations, communicate progress, and resolve issues. I am comfortable navigating complex project environments where priorities shift and risks need to be addressed proactively.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am prepared to relocate to Berlin and contribute to building scalable delivery structures for the German market. I have attached my CV for your review and would welcome the opportunity to discuss how my project management and technical delivery experience can support PADOA’s growth.

Sincerely,

Md Shahanur Islam Shagor
