I am writing to apply for the Freelancer 1st Level IT-Support position at Krˆ…ckeberg Servicegruppe. Your description of a project-based, flexible support role that values clear communication and reliable availability aligns well with my approach to technical work.

Through my experience as a software engineer and web developer, I have developed a solid technical foundation that supports effective first-level troubleshooting. I am comfortable working with Linux systems, diagnosing common hardware and software issues, managing user access and passwords, and documenting problems clearly for escalation. My familiarity with tools like Docker, Nginx, and various operating systems gives me the basic technical understanding needed to handle standard support requests efficiently.

One area that particularly interests me is the emphasis on friendly, solution-oriented communication with users. In previous roles, I regularly interacted with clients and team members to resolve technical issues, explain solutions in plain language, and ensure a positive support experience. I understand the importance of being the calm, helpful first point of contact for users who may be frustrated or under time pressure.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and welcome the opportunity to discuss my hourly rate and availability further. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
