I am writing to apply for the Learning & Education Executive position at Ignite Your Success. The opportunity to guide growth and shape futures through education is something I find genuinely meaningful, and I am interested in contributing to your team.

My background is in software engineering and AI systems, but my work has always involved teaching, explaining, and enabling others. Whether I am training AI models, documenting complex APIs, or collaborating with cross-functional teams, I have consistently focused on making technical concepts accessible and actionable for people with different levels of expertise.

In previous work, I have designed and delivered full-stack applications and AI-powered tools that required clear communication between developers, stakeholders, and end users. Breaking down technical requirements into understandable language and guiding team members through implementation has been a regular part of my workflow. This experience has given me a practical understanding of how to structure learning and support growth in a remote, flexible environment.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural settings.

I have attached my CV for your review. I would welcome the opportunity to discuss how my background and approach can support the goals of Ignite Your Success.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
