I am writing to apply for the Executive Assistant role at VPA London, supporting a global financial services firm. While my professional background is in software engineering, I bring strong organizational discipline, cross-cultural communication experience, and the ability to manage complex workflows independently in a remote environment.

Through my work as a web developer, I have consistently managed multiple project priorities, coordinated with international stakeholders, and maintained clear communication across technical and non-technical teams. These experiences have built the proactive, detail-oriented, and resilient working style that this role requires.

I am accustomed to working remotely across time zones and have developed strong systems for managing competing priorities, tracking deadlines, and ensuring smooth day-to-day operations. My experience collaborating with global teams has given me the confidence to build strong stakeholder relationships and anticipate needs effectively.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my organizational skills and remote work experience align with the needs of your client.

Sincerely,

Md Shahanur Islam Shagor
