I am writing to express my interest in the AI ML Associate position at Work Force Nexus. The role aligns with my background in applied AI, machine learning, and building intelligent systems that operate in real-world environments.

Through research and development work, I have more than one year of experience applying AI and machine learning to practical problems. My work includes integrating OpenAI models for AI-powered assistants, implementing YOLOv8n-based object detection for real-time edge inference, and building automation systems that connect AI capabilities with production workflows.

A relevant example is the Wireless Vision-Aid for the Blind project, where I designed and developed a complete real-time object detection system using YOLOv8n and Python. The system runs fully offline on low-cost hardware, processes video streams with ultra-low latency via a custom UDP protocol, and delivers multilingual audio feedback. This project required optimizing inference pipelines, managing edge deployment constraints, and ensuring reliable performance under real-world conditions.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my AI and machine learning experience can contribute to the work at Work Force Nexus.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
