I am writing to apply for the Marketing & Communication Lead Italy position at Base.com. Your mission to simplify e-commerce for sellers worldwide through an innovative all-in-one system is impressive, and I am drawn to the opportunity to contribute to Base.com's Italian market expansion.

My background is in software engineering, where I have spent over four years building full-stack web applications and platforms. This technical foundation gives me a strong understanding of the SaaS and e-commerce ecosystem, including how platforms like Shopify, Amazon, and eBay operate from a technical integration perspective. I am comfortable discussing product features, API workflows, and platform capabilities with both technical and non-technical stakeholders.

One area that particularly interests me is the digital content and brand localization aspect of this role. Through my experience developing multilingual web applications with Next.js and Laravel, I have worked on platforms that required adapting content, tone, and user experience for different regional audiences. I understand the importance of maintaining brand consistency while tailoring messaging for local markets.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my technical communication skills and e-commerce platform knowledge could support Base.com's growth in Italy.

Sincerely,

Md Shahanur Islam Shagor
