I am writing to apply for the Startup Investment & Strategy Specialist role at CapitexAI. Your focus on applying venture capital expertise to support advanced technologies aligns with my background in building and understanding technology-driven systems from the ground up.

Through my work as a full-stack and AI engineer, I have developed a practical understanding of how technology startups function. I have built scalable web applications, integrated payment gateways, implemented authentication and role-based access control, and deployed production systems on cloud infrastructure. This hands-on experience gives me a clear view of the technical decisions, operational bottlenecks, and resource requirements that early-stage companies face.

One area that particularly interests me is how investment decisions connect to technical feasibility. Having worked on projects involving AI assistants, real-time data processing, and multi-role platform architectures, I understand the gap between a product concept and a working system. I can evaluate not just market potential but also the engineering reality behind a startup's roadmap.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background could support CapitexAI's investment and strategy work.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
