I am writing to apply for the Frontend Developer position at Quinncia Inc. Your mission to improve college student outcomes through AI-driven career readiness tools is something I find genuinely meaningful, and I would welcome the opportunity to contribute to a platform that directly helps graduates transition into the workforce.

Through my professional experience as a Web Developer, I have built and maintained production-grade frontend applications using React, Next.js, TypeScript, and JavaScript. I have worked extensively with RESTful APIs, GraphQL, and modern CSS frameworks including Tailwind CSS. Writing clean, reusable code and ensuring high-quality UI through testing with Jest has been a consistent part of my workflow.

A relevant example is the Travel Agency App, where I developed the complete frontend using Next.js and TypeScript, integrated Google Maps, implemented multi-language and multi-currency support, and deployed the application on AWS Amplify. This project required close collaboration with designers and backend engineers, and I took ownership of the end-to-end UI quality and performance.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I look forward to the possibility of contributing to Quinncia’s frontend development efforts.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
