I am writing to apply for the Technischer Systemplaner Versorgungstechnik HLSK position at DP Plan Planungsbˆ…ro fˆ…r technische Gebˆ‰udeausrˆ…stung GmbH. Your focus on fully digitalized processes across all project phases aligns with my technical background in building structured, maintainable systems.

Although my core expertise is in software engineering rather than HVAC planning, I bring strong technical skills that support the digital workflows your team relies on. I have hands-on experience with Linux server environments, Docker containerization, Nginx configuration, and CI/CD pipelines. These skills are directly applicable to maintaining and optimizing the digital tools and BIM environments used in technical building equipment planning.

Through my professional experience as a Web Developer, I have worked extensively with structured data, version control systems (Git), and collaborative project workflows. I am comfortable creating and maintaining technical documentation, coordinating with team members, and ensuring that all project assets are organized and accessible. My work has consistently required careful attention to detail, systematic thinking, and reliable execution.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am confident that my technical discipline, structured approach, and willingness to learn new domains would allow me to contribute meaningfully to your planning team. I have attached my CV for your review and look forward to the possibility of discussing how I can support your projects.

Sincerely,

Md Shahanur Islam Shagor
