I am writing to apply for the Senior Accountant / Bilanzbuchhalter position at PRIME HR Agentur. While my professional background is in software engineering, I have developed a strong aptitude for handling complex financial data, building automated reporting systems, and ensuring data accuracy and security through my work on financial technology projects.

Through my project work, I have built an AI-powered financial mobile application and a full-stack personal finance management platform. These systems involved managing financial transactions, integrating payment gateways, generating reports, and ensuring data integrity across multiple modules. I designed database schemas, implemented role-based access controls, and built real-time reporting features that required careful attention to data accuracy and consistency.

One area that particularly interests me is the opportunity to support digitalization projects and improve financial workflows. My experience building automated systems and integrating third-party services has given me practical insight into how technology can streamline accounting processes, reduce manual effort, and improve reporting transparency.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my analytical skills and experience with financial systems could contribute to your client’s finance team.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
