I am writing to apply for the Kundenberater (m/w/d) Bankkaufmann position at PRIME HR Agentur´fi. While my professional background is rooted in software engineering rather than traditional banking, I bring a strong analytical mindset and hands-on experience building financial technology systems that serve customer needs effectively.

Through my work developing AI-powered financial applications, I have gained practical understanding of financial products, secure transaction workflows, and customer-facing digital services. I built a full-stack financial platform that integrated payment gateways, subscription management, and role-based authentication, which required me to think carefully about user needs, risk assessment, and regulatory considerations.

One area that particularly interests me is the opportunity to apply my analytical skills to client advisory work. In my previous projects, I regularly analyzed complex requirements, identified optimal solutions, and communicated technical concepts to non-technical stakeholders. These skills translate directly to understanding customer financial situations and offering tailored advice.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am confident that my analytical abilities, problem-solving approach, and experience with financial systems would allow me to contribute meaningfully to your client advisory team. I have attached my CV for your review and welcome the opportunity to discuss how my background aligns with this role.

Sincerely,

Md Shahanur Islam Shagor
