I am writing to apply for the Bilanzbuchhalter (m/w/d) position at PRIME HR Agentur. While my background is in software engineering and system architecture, I bring a structured, analytical mindset and a strong track record of building and optimizing complex systems that require precision, reliability, and process automation.

Through my professional experience as a Web Developer, I have designed and maintained scalable applications using Laravel, Next.js, and Node.js. These systems involved implementing authentication, role-based access control, secure payment gateways, and real-time data processing. I have also worked extensively with databases like MySQL and PostgreSQL, optimizing queries, managing schemas, and ensuring data integrity across multiple modules.

One area that particularly interests me is process optimization and workflow automation. In previous projects, I have built systems that handle complex business logic, coordinate multiple stakeholders, and generate reports automatically. This experience has given me a strong foundation in managing structured data, ensuring accuracy, and improving operational efficiency.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my analytical skills and experience with complex systems can contribute to your team.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
