I am writing to express my interest in the Leitung Cashmanagement, Liquidit^tssteuerung, Finanzen position. While my professional background is in software engineering, I bring strong analytical capabilities, a systematic approach to complex processes, and experience managing data-driven systems that align with the responsibilities of this role.

Through my work as a full-stack developer, I have built and maintained applications that handle sensitive financial data, including payment gateways, subscription management, and transaction processing. This required a rigorous understanding of data integrity, secure authentication, and reliable system monitoring. I am accustomed to managing multiple moving parts, ensuring accuracy, and maintaining clear documentation.

One area that particularly interests me is the opportunity to apply my structured thinking to liquidity planning and cash flow management. In my projects, I have designed systems that track real-time metrics, automate reporting, and provide clear visibility into operational status. These skills translate naturally to monitoring bank accounts, preparing financial statements, and ensuring that large payment flows are handled reliably.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my analytical and organizational skills can contribute to your client’s financial operations.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
