I am writing to apply for the Bilanzbuchhalter (m/w/d) position at Jobbusters´fi GmbH, where you are recruiting for a technically oriented international company. My background in software engineering, combined with a strong interest in process optimization and data-driven reporting, makes me a suitable candidate for this role.

Through my professional experience as a Web Developer, I have developed a structured and analytical approach to problem-solving. I have worked extensively with databases, data validation, and reporting systems, ensuring accuracy and consistency in every project. My work on the AI Powered Financial App involved building APIs, managing financial data, and automating workflows, which gave me hands-on experience with data integrity and process efficiency.

One area that particularly interests me is the analysis, optimization, and digitalization of accounting and finance processes mentioned in the job description. In my previous work, I have designed systems that automate repetitive tasks, generate reports, and streamline data flow. I am confident that this experience can be applied to improve reporting structures and workflow automation in a finance environment.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am a quick learner with a strong sense of responsibility and a methodical work style. I have attached my CV for your review and would welcome the opportunity to discuss how my skills can contribute to your client’s finance team.

Sincerely,

Md Shahanur Islam Shagor
