I am writing to apply for the Finanzbuchhalter (m/w/d) position at Jobbusters´fi GmbH. While my professional background is in software engineering, I bring strong analytical skills, structured work habits, and experience building financial systems that require precision and attention to detail.

Through my work developing an AI-powered financial application, I designed and implemented secure authentication systems, integrated payment processing, and built data pipelines that handled sensitive financial information. This experience required careful validation, error handling, and a methodical approach to data integrity.

In my professional experience as a web developer, I have consistently worked with complex data structures, database optimization, and reporting workflows. I am comfortable managing multiple data sources, ensuring accuracy, and maintaining clear documentation.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am confident that my analytical mindset, structured approach, and ability to manage detailed workflows would allow me to contribute effectively to your finance team. I have attached my CV for your review and look forward to the opportunity to discuss how I can support your organization.

Sincerely,

Md Shahanur Islam Shagor
