I am writing to apply for the Bilanzbuchhalter / Senior Accountant (m/w/d) position at Jobbusters´fi GmbH, on behalf of their client, a family-owned production company with international reach. While my professional background is in software engineering, I bring a strong foundation in analytical problem-solving, process optimization, and building systems that handle complex data accurately and efficiently.

Through my work as a Full-Stack and AI Engineer, I have developed a systematic approach to managing data flows, automating repetitive tasks, and ensuring data integrity across platforms. One area that particularly interests me is the emphasis on digital transformation and process optimization within the finance team. I have hands-on experience building automation solutions and reporting tools that reduce manual effort and improve accuracy.

In previous projects, I have designed and developed full-stack applications that handle financial data, including an AI-powered financial app that processes transactions, generates PDF reports, and integrates with cloud services for secure data handling. I also built a personal finance platform with real-time updates, budgeting modules, and advanced reporting features. These experiences have given me a practical understanding of financial workflows, data reconciliation, and the importance of reliable reporting.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am confident that my analytical mindset, process-oriented approach, and experience with automation and reporting tools would allow me to contribute meaningfully to the finance team. I have attached my CV for your review and welcome the opportunity to discuss how my skills align with this role.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
