I am writing to apply for the Kundenberater/in im kommunalen Kundenservice position at hey contact heroes GmbH. Your model of on-site training followed by full home-office work aligns well with my approach to learning and delivering consistent results.

As a software engineer, I have developed strong analytical and problem-solving skills that transfer directly to customer service. I am comfortable working with CRM systems and have hands-on experience managing data in MySQL and other database tools. I approach every interaction with care and focus on finding practical solutions.

In my previous work as a Web Developer, I regularly communicated with clients and stakeholders to understand their needs, document issues accurately, and follow through until resolution. I am used to working independently and managing my time effectively in remote environments.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am ready to complete the 4-week training in Hamburg and contribute to your team from home-office. I have attached my CV for your review.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
