I am writing to apply for the Senior Systemadministrator position at KORDEL Antriebstechnik GmbH. Your company's role as a technology leader in drive systems for the intralogistics and construction machinery industry is impressive, and I am interested in contributing to the stability and security of your IT infrastructure.

Through my professional experience, I have developed practical skills in Linux server administration, network configuration, and IT security. I have worked with Docker, Nginx, Apache, and CI/CD pipelines to maintain reliable and secure systems. My approach focuses on ensuring availability, performance, and proactive issue resolution.

One area that particularly interests me is the administration of IT security solutions and the creation of system documentation. In previous projects, I have implemented monitoring dashboards and automated deployment workflows, which aligns with your need for continuous optimization of IT infrastructure and independent project execution.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills can support your team in Dˆ…lmen.

Sincerely,

Md Shahanur Islam Shagor
