I am writing to apply for the Software Engineering position at Fischer & Partner Gesellschaft fˆ…r Personal mbH. My background in full-stack development and AI engineering aligns with the technical requirements of this role.

Through my professional experience, I have developed and maintained scalable web applications using Laravel and Next.js. I have built RESTful APIs, implemented secure authentication systems, and integrated payment gateways. My work includes optimizing database queries and deploying applications on Linux servers with Docker and Nginx.

One area that particularly interests me is digitalization. In my previous role at Explo-IT, I contributed to modernizing workflows by building real-time features using WebSockets and implementing role-based access control. I also have experience with server monitoring and deployment automation using CI/CD pipelines.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and welcome the opportunity to discuss how my skills can contribute to your team.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
