I am writing to apply for the Performance Marketing Manager role at Varun Digital Media. While my professional background is in software engineering, I bring a strong technical foundation in building data-driven systems, automation, and scalable platforms that directly support performance marketing operations.

Through my experience as a full-stack developer, I have built and maintained applications that handle user authentication, payment gateways, real-time notifications, and third-party API integrations. These systems required a deep understanding of data flow, performance optimization, and reliable deployment processes.

One area that particularly interests me is the intersection of technology and marketing. I have developed platforms that manage user roles, subscription plans, and automated workflows using tools like Laravel, Next.js, Node.js, and MySQL. These projects gave me hands-on experience with data-driven decision-making and system-level automation.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
