I am writing to apply for the Clinical Research Associate position at i-Pharm Consulting. While my professional background is in software engineering and autonomous systems, the core competencies required for this roleâ meticulous attention to detail, structured data management, and adherence to rigorous protocolsâ are central to my work.

Through research and development work, I have built systems that demand precision and reliability. For example, I developed a Wireless Vision-Aid for the Blind (WVAB) using YOLOv8n object detection, which required careful validation of detection accuracy and real-time performance. This project involved systematic testing, data logging, and iterative refinement to ensure consistent results under varying conditions.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills can contribute to your team.

Thank you for your consideration.

Sincerely,

Md Shahanur Islam Shagor
