I am writing to apply for the Project Manager position at Kate Farms. Your mission to make nutrition the cornerstone of healthcare is meaningful, and I would welcome the opportunity to support your Blended Program through the end of 2026.

My professional experience has centered on delivering complex technical projects while coordinating across multiple teams. At Explo-IT, I worked closely with product, engineering, and operations stakeholders to define milestones, manage dependencies, and ensure timely delivery of web applications. I developed integrated project plans, tracked risks and action items, and provided regular status updates to leadership. This hands-on experience in driving cross-functional execution aligns well with the responsibilities of this role.

One area where I have consistently added value is bringing structure to ambiguous requirements. In my previous work, I have taken loosely defined product goals and translated them into actionable development plans with clear timelines and ownership. I am comfortable facilitating alignment among teams with different priorities and ensuring that critical milestones are achieved without compromising quality.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am eager to bring my project coordination skills, attention to detail, and commitment to collaborative execution to Kate Farms. I have attached my CV for your review and welcome the opportunity to discuss how I can contribute to your team.

Sincerely,

Md Shahanur Islam Shagor
