I am writing to apply for the Capital Planning Analyst position at PBG. Your focus on delivering mission-critical solutions for federal agencies aligns with my experience in building systems that require precision, documentation, and cross-functional communication.

Through my professional experience, I have developed and validated investment artifacts, analyzed spend plan data, and ensured alignment between project deliverables and approved funding. I have worked with stakeholders at various levels to communicate analysis and recommendations clearly, supporting portfolio data calls and business case reviews.

One area that particularly interests me is the emphasis on Earned Value Management (EVM) and ensuring consistency across traditional and agile development models. In my previous work, I have analyzed contract data, developed corrective action plans, and maintained documentation repositories to support investment health reviews.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and welcome the opportunity to discuss how my background in analysis, documentation, and stakeholder communication can support PBG’s mission.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
