I am writing to apply for the Program Manager position at PBG. Your focus on delivering mission-focused solutions for federal agencies requiring agility, security, and impact aligns with my experience in managing technical projects and coordinating teams to meet quality, schedule, and compliance goals.

Through my professional experience as a Web Developer, I have led the delivery of full-stack applications, serving as the primary point of contact for clients and ensuring that project milestones are met on time. I have developed and maintained project plans, status reports, and work schedules, coordinating the efforts of development, design, and QA teams to maintain delivery quality and security compliance.

One area that particularly interests me is the emphasis on CPIC and financial management support services. In my previous roles, I have managed projects that required adherence to governance frameworks, risk mitigation, and clear communication with stakeholders. I have experience identifying programmatic risks, escalating issues appropriately, and ensuring that team members adhere to quality and security standards.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
