I am writing to apply for the Front End Developer Fresher position at ZYPHRA TECH. Your focus on building responsive, visually appealing web applications aligns directly with the frontend work I have been doing over the past several years.

Through my professional experience as a Web Developer, I have built responsive user interfaces using React, Next.js, TypeScript, Tailwind CSS, and Bootstrap. I regularly convert UI/UX designs into clean, efficient, and reusable code while ensuring cross-browser compatibility and performance optimization. My work also involves collaborating closely with designers and backend developers to deliver seamless user experiences.

One project that reflects this is the Travel Agency App, where I developed the full frontend using Next.js, TypeScript, Tailwind CSS, Material UI, and Google Maps. The platform supports multiple languages and currencies, and I focused on creating a responsive, SEO-friendly interface that works consistently across devices. I also handled the deployment of the frontend to AWS Amplify.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to the ZYPHRA TECH team.

Sincerely,

Md Shahanur Islam Shagor
