I am writing to apply for the Business Development Representative MARCORSYSCOM position at NOBLE. Your work providing global sustainment and operations support for the U.S. Military and civilian government agencies is impressive, and I am interested in contributing to your mission.

My background is in software engineering, where I have spent over four years building full-stack web applications and AI-powered systems. While this role is focused on business development rather than engineering, my technical experience gives me a strong ability to understand customer requirements, capability gaps, and technical solutions in the defense and government space.

In my professional experience as a Web Developer at Explo-IT, I collaborated closely with stakeholders to understand mission needs, translated technical requirements into actionable development plans, and delivered scalable applications. I also worked on projects involving secure communication protocols and decentralized systems, which has given me familiarity with the types of technical challenges relevant to DoD and Marine Corps environments.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
