I am writing to apply for the 24 HR Review VA Virtual Receptionist position at OnlineJobs.PH. I understand this role requires strong communication skills, attention to detail, and the ability to handle administrative tasks reliably in a remote setting. While my professional background is in software engineering, I have developed habits of precision, organization, and clear communication that transfer directly to this position.

In my previous work as a web developer, I regularly managed scheduling, documentation, and coordination across distributed teams. I handled client communication, tracked project timelines, and ensured that deliverables met quality standards. These tasks required the same level of reliability and structured follow-through that a virtual receptionist role demands.

One area where I consistently performed well was managing multiple priorities under deadlines. I am comfortable working independently, documenting processes clearly, and maintaining composure when handling requests or resolving issues. I approach every task with a focus on accuracy and timely completion.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my work habits and reliability can contribute to your team.
