I am writing to apply for the Gerente de Receita Sˆ“nior position at E-inscriˆ§ˆ£o. Your platform serves Christian organizations managing events, and the focus on unifying acquisition, retention, and expansion under a single revenue strategy is a compelling challenge. While my professional background is in software engineering, I bring a strong technical understanding of the systems that power SaaS revenue operations.

Through my professional experience as a Web Developer, I have built full-stack platforms using Laravel, Next.js, and MySQL, integrating payment gateways, subscription models, and role-based access control. These systems directly support recurring revenue metrics such as MRR, ARR, and churn tracking, and I have worked closely with product and business teams to align technical delivery with commercial objectives.

One area that particularly interests me is the integration of CRM and pipeline management with backend systems. I have experience deploying and maintaining applications on Linux servers with Docker, Nginx, and CI/CD pipelines, and I am comfortable working with data-driven dashboards and reporting tools. My analytical approach to system design translates well to building forecasting and revenue reporting processes.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my technical background can support E-inscriˆ§ˆ£o’s revenue growth strategy.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
