I am writing to apply for the Marketing Manager position at Hunt St. While my professional background is rooted in software engineering, I bring strong analytical thinking, project coordination, and cross-functional communication skills that are directly relevant to managing marketing operations in a remote environment.

Through my experience as a Web Developer at Explo-IT and DataSoft LTD, I have worked closely with stakeholders to deliver complex projects on time, coordinated between technical and non-technical teams, and managed end-to-end workflows. These experiences have built a disciplined approach to planning, execution, and reporting.

I am comfortable working independently, aligning with AU business hours, and collaborating across time zones. I communicate clearly in English and Bengali, and I have working knowledge of Russian and Hindi.

I have attached my CV for your review. I would welcome the opportunity to discuss how my background can contribute to Hunt St’s marketing goals.

Sincerely,

Md Shahanur Islam Shagor
