I am writing to express my interest in the Analyst Customer Success Measurement US position at Cint. The opportunity to work on a platform that powers research and media measurement for a global audience is genuinely compelling, and I am eager to contribute to the Customer Success team.

My background in software engineering has developed strong analytical and problem-solving skills that align well with this role. Through my professional experience, I have become comfortable working with data, identifying patterns, and translating complex technical information into practical, actionable insights. I approach problems methodically and enjoy the process of breaking down challenges to find clear solutions.

In previous roles, I worked directly with stakeholders to understand their needs, communicate progress, and ensure project objectives were met. This experience has prepared me to serve as a trusted advisor to customers, helping them navigate measurement strategy, product capabilities, and best practices. I am confident in my ability to build strong customer relationships through proactive communication and ongoing partnership.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application, and I look forward to the possibility of contributing to Cint’s Measurement Customer Success team.

Sincerely,

Md Shahanur Islam Shagor
