I am writing to apply for the Werkstudent: Web-Entwickler position at Himbeer Media. Your focus on improving live e-commerce shops and investing in developer growth matches how I like to work.

Through professional web development experience, I have built a strong foundation in JavaScript, HTML, and CSS. I have worked extensively with React and Next.js to create responsive, user-friendly interfaces. I also have experience integrating AI features into web applications using OpenAI APIs, which aligns with your interest in working with AI.

In previous roles, I handled weekly changing tasks across frontend and backend systems. I built RESTful APIs, implemented authentication and role-based access, and deployed applications on Linux servers using Nginx and Docker. I am comfortable jumping into small, fast-moving projects and delivering real development work for live systems.

One area that particularly interests me is combining design sense with technical implementation. I have a good eye for aesthetics and enjoy building interfaces that look clean and work well. I also bring a curious mindset and am always ready to dive into topics I haven't explored yet.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how I can contribute to Himbeer Media.

Sincerely,

Md Shahanur Islam Shagor
