I am writing to apply for the Head of Finance (w/m/d) position at EMIL Group GmbH. Your focus on building a scalable, data-driven finance function for a growing B2B SaaS company aligns directly with my background in developing AI-powered financial systems and full-stack applications.

Through my professional experience as a Full-Stack & AI Engineer, I have built systems that automate financial workflows, process real-time data, and generate actionable insights. I developed an AI-powered financial application using Express, TypeScript, OpenAI, and AWS, which handles data ingestion from Google Sheets, processes user queries through trained AI assistants, and automatically generates PDF term sheets sent via AWS SES. This experience has given me a practical understanding of how technology can drive efficiency, transparency, and scalability in finance operations.

In my work as a Web Developer, I designed and maintained scalable web applications using Laravel and Next.js, integrating RESTful APIs, authentication, role-based access control, and payment gateways. I also deployed applications on Linux servers with Docker and Nginx, ensuring reliable and secure production environments. These projects required close collaboration with stakeholders to translate business requirements into technical solutions, a skill I would bring to partnering with your management team on strategic financial decisions.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my background in AI-driven financial systems and full-stack development can contribute to the continued growth of EMIL Group.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
