I am writing to apply for the WEG- und Mietenbuchhalter position at Phoenix Personalvermittlung GmbH. While my professional background is in software engineering rather than accounting, I bring strong analytical capabilities, a structured approach to data management, and a proven ability to learn new domains quickly.

Through my work as a Full-Stack Developer, I have built and maintained systems that handle complex financial transactions, user data, and real-time reporting. Working with MySQL and PostgreSQL databases has given me a disciplined approach to data accuracy, reconciliation, and error-free processing. These skills translate directly to the precision required for Mietabrechnungen and WEG-Buchhaltung.

One area that particularly interests me is the opportunity to apply my systematic thinking to property accounting. In previous projects, I developed systems that required careful tracking of payments, automated reporting, and thorough documentation. I am confident I can bring this same level of reliability to managing Mietzahlungen, Wirtschaftsplˆne, and Jahresabrechnungen.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am ready to learn the specific accounting regulations and software used in German property management. I’ve attached my CV for your review and would welcome the opportunity to discuss how my skills can contribute to your team.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
