I am writing to apply for the Video Editor:in position at MainTea GmbH. Your approach to building multiple food and beverage brands with a hands-on, character-first culture stands out to me. I appreciate that you value motivation and practical skills over formal seniority.

My background is in software engineering and full-stack development, where I have spent years building user-facing platforms that rely on strong visual design, smooth interfaces, and content that keeps people engaged. Through this work, I have developed a sharp sense of what makes digital content work on social media, especially short-form video formats like Reels and TikToks.

I am comfortable using CapCut as a primary editing tool and have foundational knowledge of Premiere Pro for larger projects. I understand the mechanics of UGC and performance marketing: why certain cuts, pacing, and hooks drive engagement while others do not. I am used to working closely with teams that analyze performance data and iterate based on results.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am motivated, independent, and ready to bring my editing skills and social media awareness to MainTea’s brands. I have attached my CV for your review and would welcome the chance to show you what I can do.

Sincerely,

Md Shahanur Islam Shagor
