I am writing to apply for the Werkstudent Customer Management position at secupay AG. Your focus on payment processes and customer management aligns with my technical background and my interest in the fintech sector.

Through my professional experience as a Web Developer, I have built and maintained full-stack applications that handle payment gateway integration, user authentication, and secure data management. I am comfortable working with structured data, testing system workflows, and ensuring accuracy in financial transactions. My work with Laravel, Next.js, and MySQL has given me a solid foundation in building reliable, data-driven systems.

One area that particularly interests me is the opportunity to support PayOp processes and assist with POS terminal configuration. In previous projects, I have worked on systems that required careful testing of technical workflows, role-based access control, and attention to detail in data handling. I am confident I can contribute to these tasks with a structured and reliable approach.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am currently pursuing a Bachelor’s degree in Software Engineering, which keeps me engaged with new technologies and structured problem-solving. I am eager to bring my organizational skills, technical mindset, and willingness to learn to the Customer Management team at secupay AG. I have attached my CV for your review.

Sincerely,

Md Shahanur Islam Shagor
